Continuation of Attachment(s) 9. Other: Drawing filed on 5/28/04 is accepted by the examiner.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jennifer Hayes on February 21, 2006.

The application has been amended as follows:

Examiner required a restriction under 35USC 121 between the following groups:

Group I (claims 1-2, 4-10), classified in class 428, subclass 40.1.

Group II (claims 19-21), classified in class 428, subclass 131.

The two groups are distinct and independent because Group I does not require the release liner to have holes wherein the peripheral regions around the holes is thickened as swelling towards the side of the release face.

Jennifer Hayes elected Group I (claims 1-2 and 4-10), reserving the right to file divisional application on the non-elected invention Group.

Claims 19-21 have been canceled as being directed to the non-elected invention Group II.

Claims 11-18 and 22 have been cancelled as being directed to invention Group that was non-elected without traverse.

TERMINAL DISCLAIMER

2. The terminal disclaimer filed on February 1, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Application serial no. 10/833305 has been reviewed and is accepted. The terminal disclaimer has been recorded.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

A review of applicants' arguments in amendment filed on February 1, 2006 and a review of the instant amended claims has convinced the examiner that the claims are allowable over the applied prior art of record. The prior art fails to teach a release liner that has recesses at the sites of its surface that corresponds to the projected spots of fibers of the pressure sensitive adhesive layer. Also, no evidentiary support could be provided to support the position that the instant claimed invention would have been obvious to one of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmiad whose telephone number is 571-272-
